We'll Keep You Running On Air - Air Powered Product Guide

HIRE SALES SERVICE
airpoweredservices.com.au

1800 AIRPOW
Branches Nationally

From sales, to servicing, to equipment hire, with us on speed dial, downtime is something only other people worry about.

We'll keep you running on air

If you're in construction or manufacturing, downtime is always going to be your biggest risk.

Every hour your operators are left standing around while a recorded voice reassures you how "important" your call is to them, you're losing serious money. And it's not just your hip pocket taking a hit, it's your reputation – the one business asset you can't replace.

As the specialists in compressed air, 35+ years in this business has taught us that nailing the basics is what keeps your business running. It's our job to make your life simple: one number to reach one team who does it all (and whatever it takes) to get the job done.

HIRE

Responsive.

Reliable.

Cost-effective.

For any size project (or contingency plan),
we have a wide range of compressed air
equipment ready to show up wherever and
whenever you need.
No worries.

FULLY OPERATIONAL RENTAL AGREEMENTS

Whether you need compressed air equipment short-term, long-term, or for a specific project, our rental solutions are designed to keep you fully operational - without the capital outlay. With reliable gear, flexible terms, and responsive support, our rental agreements take the pressure off.

Standard Rental Agreements

Rental Agreements

Air Powered retains ownership while you enjoy exclusive use of the equipment for one to five years. At the end of the term, simply return it, renew the rental, or upgrade to a newer model.

- Access industry-leading compressors and tools, fast
- No maintenance stress - full servicing included
- 24/7 breakdown support for our air specialists
- No capital outlay, no hidden costs - just reliable air on demand

Rent to Purchase Agreements (with Rebate)

Own the Gear, On Your Terms

Need a pathway to ownership? Start with rental and convert when it suits you, with a portion of your payments rebated off the final purchase price. It's the flexible way to own the gear you trust, without upfront investment.

- Start with rental, convert to ownership when ready
- Competitive rebate applied to the final purchase
- Suits growing businesses and long-term projects
- Access the equipment you need now, without upfront costs.

HIGH PRESSURE AIR COMPRESSORS

Engineered for demanding applications, our high pressure compressors deliver reliable performance at pressures well above standard systems. Ideal for drilling, blasting, and other heavy-duty operations, they offer the power, efficiency, and durability needed to keep your project running smoothly.

DIESEL AIR COMPRESSORS

Whatever the size, scope and requirement of your project, we have a huge range of diesel air compressors available for hire.

Our full range extends beyond what's shown here. Contact us if you're chasing something specific.

High Pressure Diesel Compressor

Compressor Output		Pressure	
CFM	Litres/Sec	PSI	Bar
400	188	175	12.5
400	188	200	14
400	188	150	10
450	212	200	14

Large High Pressure Diesel Compressors

Compressor Output		Pressure	
CFM	Litres/Sec	PSI	Bar
900	424	500	34
1000	492	350	24
1200	566	350	24

Small Compressors

Compressor Output		Pressure	
CFM	Litres/Sec	PSI	Bar
40	18	100-215	7-15 (petrol)
110	51	100	7 (diesel)
180	84	100	7 (diesel)
250	117	100	7 (diesel)

Medium Diesel Compressors

Compressor Output		Pressure	
CFM	Litres/Sec	PSI	Bar
250	117	100	7
400	188	100	7

Large Diesel Compressors

Compressor Output		Pressure	
CFM	Litres/Sec	PSI	Bar
750	353	120	8.6
850	401	120	8.6
1000	471	150	10

Compressor Output		Pressure	
CFM	Litres/Sec	PSI	Bar
1600	755	150	10
1800	849	200	14

100% OIL FREE ELECTRIC AIR COMPRESSORS

Our oil-free electric compressors deliver clean, contaminant-free air for sensitive applications such as food, beverage, pharmaceutical, and electronics manufacturing. Quiet, efficient, and environmentally friendly, they're available for short or long-term hire to meet your project's exact requirements.

100% OIL FREE DIESEL AIR COMPRESSORS

Delivering clean, oil-free air anywhere it's needed, our diesel-powered units are ideal for remote or sensitive worksites. Built for reliability in harsh conditions, they provide contaminant-free performance for industries such as food, beverage, pharmaceutical, and petrochemical - without compromising on mobility or power.

Electric Oil Free Compressors

Our fleet consists of a large range of electric oil free compressors for specialist applications that cannot risk oil contamination.

Ideal for industrial, petrochemical, medical, food and beverage applications. Consider pairing with a desiccant dryer for high quality -40°C or -70°C dewpoint!

Features & Benefits

- High air quality
- Low maintenance
- Energy efficient
- Environmentally friendly

Compressor Output		Pressure	
CFM	Litres/Sec	PSI	kW
100	47	100	18
160	75	100	30
260	122	100	55
400	188	100	75
600	283	100	110
800	377	100	145
1000	471	100	160
1600	755	100	250

Diesel Oil Free Compressors

As specialists in oil free rental, our large range of oil free diesel compressors are a sight to behold.

For specialist applications that cannot risk oil contamination and where suitable electrical supply is not available. Ideal for industrial, petrochemical, medical, food and beverage applications.

Features & Benefits

- High air quality
- Low maintenance
- Energy efficient
- Environmentally friendly

Compressor Output		Pressure	
CFM	Litres/Sec	PSI	Bar
1500	707	145	10
1600	755	145	10

STANDARD ELECTRIC ROTARY SCREW AIR COMPRESSORS

Providing dependable, high-output performance, our oil flooded compressors are ideal for a wide range of industrial applications. Designed for efficiency and durability, they deliver consistent airflow for manufacturing, construction, and processing environments - available for short or long-term hire.

COMPRESSED AIR DRYERS & FILTRATION

Keep your compressed air clean and dry with our reliable dryers and filtration systems. Designed to remove moisture, oil, and contaminants, our equipment ensures optimal performance and protects your tools and machinery from damage.

Rotary Screw Compressors

- Features & Benefits**
- Economical
 - Reliable for consistent supply of compressed air
 - Great for 24 hour cycles
 - Can be supplied with built in dryers & filter packs

Compressor Output		Pressure	
CFM	Litres/Sec	PSI	kW
40	19	100	7.5
60	28	100	11
120	56	100	22

Compressor Output		Pressure	
CFM	Litres/Sec	PSI	kW
200	94	100	37
250	117	100	45
400	188	100	75
600	283	100	110
800	377	100	132
1000	509	100	160
1200	566	100	185
1600	755	100	200

Desiccant + Refrigerated Air Dryers

- Desiccant Air Dryers**

Features & Benefits

 - High flow desiccant air dryers ranging from -40°C to -70°C dew point
 - Electrical packages or fully air operated 'skid rigs' consisting of filter packs, twin towers and an after cooler.
- Refrigerated Air Dryers**

Features & Benefits

 - Protect your plant and equipment from corrosion by using these units to dry air for your industry
 - 240 volt and 3 phase units available

Sizes available from 40 CFM - 2000 CFM

Air Receiver Tanks

- Features & Benefits**
- Air receivers provide additional capacity during periods of peak demand
 - Used to separate condensate from the compressed air
 - Available in many sizes and pressure requirements

Sizes available from 40 to 25,000 litres

RIGSAFE COMPRESSORS

Offshore applications demand the highest quality machinery, and the most stringent safety requirements in the world. Air Powered have manufactured a range of Rigsafe Compressors which are used extensively on oil rigs.

SPECIAL PROJECTS

Air Powered designs and manufactures custom compressed air systems to suit specialised applications, environments, and project needs.

Available to hire or purchase

Rigsafe Air Compressors

Features & Benefits

- Full fire suppression system
- Chalwyn valve (air intake shutdown)
- Exhaust spark arrestor
- Fuel shut down sentinel
- Flameproof exhaust system

Features & Benefits

- Compact - can be moved around the rig
- Integrated aftercooler
- Offshore compliance
- Spark arrestor
- Chalwyn valve
- Fully bunded
- Fire extinguisher
- Certified DNV rated lifting frame
- Ideal for blasting and coatings
- Small footprint

When standard solutions don't fit, we build the one that does.

Special Project – Out of the Box Solutions

Have a unique challenge? Air Powered offers custom-designed compressed air solutions tailored to specialised projects and environments. From concept to commissioning, we work with you to design, build, and deliver a fit-for-purpose system, whether it's for remote sites, non-standard applications, or complex setups.

When off-the-shelf won't cut it, we'll engineer the solution that does.

Current Builds

- Modular turnkey packages
- Compressor blow down packages
- Compressor and air receiver packages
- Zone 2 compressor packages
- Breathing air packages
- Manifolds
- Scouring trailers
- Sandblasting kits

BREATHING AIR EQUIPMENT

Our extensive range of breathing air equipment offers top-of-the-line respiratory solutions, meeting the highest of safety standards.

CONFINED SPACE EQUIPMENT

Our diverse range of confined space equipment provides the necessary tools and safety gear to ensure secure and compliant operations in confined spaces, prioritising worker protection and operational efficiency.

Breathing Air Sets

- Features & Benefits**
- Fully certified and compliant
 - Diesel, 3 phase & 240 volt operated
 - Suit every multiple man use
 - Packaged up to suit specific jobs
 - Can incorporate fully auto backup systems
 - CO + CO2 removal
 - Warning alarms

Back Up Sets

- Features & Benefits**
- Secondary supply of breathable air
 - Ultimate support & peace of mind in critical applications

S.C.B.A Sets

- Features & Benefits**
- Fully self contained breathing apparatus with multiple spare bottles
 - Short term entry
 - Up to 45 minutes per bottle

Confined Space Kit

- Features & Benefits**
- For confined space entry
 - Adhering to all current safety standards
 - Lightweight & portable
 - Adjustable locking legs
 - Safety chains

Escape Sets

- Features & Benefits**
- For emergency air supply while exiting hazardous situations
 - Light to carry
 - Compact for storage

Gas Detectors

- Features & Benefits**
- Providing the ultimate in safety
 - Alerts user of contaminated environment before entry
 - Small in size
 - Easy to use
 - Reliable
 - Four alarms

UNDERGROUND BORERS

Pneuvibe Underground Borers provide an efficient and cost effective alternative to open cut excavation. Equipped with two alternative head styles, and available in both long and short versions, our borers are Australian made and suitable for a variety of projects.

Available to hire or purchase

GENERATORS & LIGHT TOWERS

Whether you require a reliable source of electricity or bright lighting for your project or event, our diverse range of generators and light towers are designed to provide efficient performance and dependable functionality.

Generators - up to 1250 kVa

Our generator hire fleet delivers reliable power from small site units to large-scale 1250 kVA systems. Designed for performance and fuel efficiency, all units are fully maintained and ready for rapid deployment across any application or environment.

Features & Benefits:

- High Fuel Efficiency
- Robust Build
- Lower Operating Costs
- Reliable Power Supply

Underground borers

Suitable for

- Underground installation of sewage pipe, telephone, gas and electricity lines, etc.
- An efficient & cost effective alternative to open cut excavation

Sizes available

• 45 mm	• 76 mm
• 54mm	• 100 mm
• 65 mm	• 130 mm

Features & Benefits:

- Australian made for Australian conditions
- Available in three head styles
- Available in both long and short versions
- Features a heavy duty quick connect coupling for easy attachment to the heavy duty hose
- One year warranty

18-75 CFM compressor output required

LED Light Towers - Diesel Powered

Features & Benefits

<ul style="list-style-type: none">• 4 x LED lights on a 48v 'extra low voltage' system• Easy one person set up• External emergency stop• Moulded hoods	<ul style="list-style-type: none">• Forklift/crane lifting points• Folding drawbar• 50° light head tilt• 116° Rotation of Light Head• LED Trailer traffic lights
---	--

Mobile Street Lamp - Solar Powered

Features & Benefits

<ul style="list-style-type: none">• 2 x 100w LED Modules• 23,000 lumen output• 24-60 hour runtime• 5 meter mast height• Mast type cable winch• Light bar tilt 0-45 °	<ul style="list-style-type: none">• 3700 m2 at 5 lux coverage• 2.6kWh Lithium Ion (LFP) battery• 340Wp solar
---	--

AIR POWERED TOOLS

Our wide range of air powered tools offers a versatile selection for various applications, ensuring efficiency and precision in any task.

Sandblaster	Scabblers	Floor Scabbler & Scarifiers
		
<p>Strip back concrete & paint in preparation of work.</p> <p>Compressor output required</p> <ul style="list-style-type: none">• 180 CFM for the 40 litre unit• 250 CFM for the 200 litre unit	<p>Ideal for removing and rough concrete surfaces.</p> <p>Range Includes</p> <ul style="list-style-type: none">• Single head scabbler• Triple head scabbler• Pogo scabblers <p>40 CFM compressor output required</p>	<p>Removes paint & epoxy from concrete.</p> <p>Range Includes</p> <ul style="list-style-type: none">• Flour units• Hand held units• 5 headed floor scabblers• 7 headed floor scabblers <p>180 - 250 CFM compressor output required</p>
Jackhammers & Rock Drills	Air Operated Saws	Air Pumps
		
<p>Ideal for any construction or demolition application.</p> <p>Range Includes</p> <ul style="list-style-type: none">• 14 kilos• 17 kilos• 40 kilos <p>100 CFM compressor output required</p>	<p>Ideal for a large range of applications.</p> <p>Range Includes</p> <ul style="list-style-type: none">• Hack saw• Demolition saw• Circular saw• Ring saw <p>70 CFM compressor output required</p>	<p>Range includes</p> <ul style="list-style-type: none">• Air submersible pumps• Air diaphragm pumps• Air venturi pumps• Air teledyne pumps <p>70-180 CFM compressor output required</p>

AIR POWERED TOOLS

Our wide range of air powered tools offers a versatile selection for various applications, ensuring efficiency and precision in any task.

External & Internal Vibrators	Impact Wrenches	Star Picket Drivers
		
<p>External & Internal Vibrators suited to large slab & form work pours.</p> <p>Range Includes</p> <ul style="list-style-type: none">• 2" submersible• 3" submersible <p>40 CFM compressor output required</p>	<p>Ideal for trucks, bridges & heavy duty applications.</p> <p>Range Includes</p> <ul style="list-style-type: none">• 1 1/2"• 3/4"• 1• 1 1/2" <p>20 - 70 CFM compressor output required</p>	<p>Features & Benefits</p> <ul style="list-style-type: none">• Proven in Australian Conditions• Ideal for building long strained fencing• Will drive pickets through:<ul style="list-style-type: none">• Bitumen• Shell• Black soil• Ironstone• Sandstone <p>30 CFM compressor output required</p>
Air Hoist	Dust Extraction	Air Fans
		
<p>Ideal for fast & easy hauling or lifting. Light compact models to rugged heavy duty models available.</p> <p>Range includes</p> <ul style="list-style-type: none">• 1-2 tonne units <p>130 CFM compressor output required</p>	<p>Portable sets for on site use enabling easier access to smaller areas.</p> <p>Sizes available</p> <ul style="list-style-type: none">• 300 mm• 600 mm <p>Range includes</p> <ul style="list-style-type: none">• Extraction fans & filter sets• Filter boxes	<p>Large selection of petrol, electric & air operated fans.</p> <p>Sizes available</p> <ul style="list-style-type: none">• 400 mm• 600 mm <p>180 CFM (air grade) compressor output required</p>

SALES

When it comes to purchasing air powered equipment, it's not just our name that matters, it's the one on the machine.

We partner with the world's leading brands to offer products that are designed and built to last, so you know you're making a smart investment.

PARTNERING WITH WORLD-LEADING BRANDS

At Air Powered, we are committed to delivering the highest value to our customers by partnering with world-leading brands in the compressed air industry. Our collaborations ensure that we provide equipment and services that are synonymous with reliability, trust, and superior performance.

Partnering with World-Leading Brands for Unmatched Quality and Reliability

By aligning with top-tier manufacturers, we bring you cutting-edge technology and robust solutions that meet the rigorous demands of various industries. Our carefully selected partnerships means you can count on us for:

- **Unrivalled Quality:** Access to premium products designed and tested to the highest standards.
- **Exceptional Reliability:** Dependable performance that minimises downtime and maximises productivity.
- **Trust and Integrity:** Proven track records and a shared commitment to customer satisfaction.

With Air Powered, you not only get state-of-the-art equipment but also the assurance of support and service that keeps your operations running smoothly. Explore our catalogue and discover how our partnerships bring you the best in compressed air solutions.

ALUP ROTARY SCREW OIL FREE COMPRESSORS

For industries where pure, oil-free air is essential, the ALUP OF range provides clean, reliable air to protect both operations and product quality. When your application demands absolutely contaminant-free air, ALUP's OF compressors deliver 100% certified oil-free air, free from oil, aerosols, and other impurities - guaranteeing the highest levels of safety, efficiency, and performance.

ALUP ROTARY SCREW COMPRESSORS

From steady airflow to energy-saving performance, our range of ALUP Compressors includes fixed speed, variable speed, and oil-free models suit a wide range of industrial needs.

14kW to 160kW ALUP Oil Free Rotary Screw Compressors

Why We Choose ALUP?

Efficient, Reliable, and Built to Perform
ALUP Compressors feature energy-efficient IE4 motors, quiet operation, and easy maintenance. Engineered for durability and versatility, they suit industries from manufacturing and automotive to food, beverage, pharmaceutical, and beyond.

Drive Options

- Fixed-Speed:** Delivers constant airflow - ideal for applications with steady, unchanging air demand.
- Variable-Speed:** Adjusts output to match demand, reducing energy use and operating costs.
- iPM (Internal Permanent Magnet):** High-efficiency drive offering up to 45% energy savings through smart motor technology.
- Oil-Free:** Provides 100% oil-free, Class 0 certified air - essential for clean-air industries like food, pharma, and electronics.

7.5kW to 350kW Range of ALUP Rotary Screw Compressors

Wide Power Range

From 7.5kW to 350kW, ALUP Rotary Screw Compressors deliver dependable performance for operations of all sizes - from small workshops to large-scale industrial facilities.

Flexible Drive Options

- Choose the drive system that best suits your needs:
- Fixed-speed** models for steady, consistent air demand.
 - Variable-speed drive (VSD)** models that adjust output to match usage, lowering energy costs.
 - iPM (Internal Permanent Magnet)** drive technology, offering up to 45% energy savings with smart motor efficiency.

Built for Industry

European Engineered, ALUP Compressors combine reliability, durability, and quiet operation, ensuring a continuous supply of compressed air to keep production moving - even in demanding environments.

CHICAGO PNEUMATIC DIESEL COMPRESSORS

Built to perform wherever the job takes you, Chicago Pneumatic's Red Rock diesel compressor range delivers serious power in a compact, portable design. Whether you're running tools on a remote site, powering equipment in the field, or tackling daily trade work, these compressors are ready to go - and go the distance.

CHICAGO PNEUMATIC DIESEL COMPRESSORS

Our CP diesel compressors are designed to power multiple hand tools and hammers simultaneously, boosting efficiency on site. Perfect for sandblasting, irrigation blow-outs, and general construction, they combine noise-reducing enclosures with simple controls and a low-maintenance design - ensuring reliable performance day after day.

Small Air - up to 180 CFM	Medium Air - up to 400 CFM	Large Air - up to 850 CFM
---------------------------	----------------------------	---------------------------

Portable. Powerful. Tough. Tough, towable, and built for site work, Red Rock compressors feature a rugged polyethylene canopy and standard DOT trailer with torsion suspension - delivering reliable, high-efficiency air power in any condition.	Reliable Air Power for Every Site. CP's medium portable compressor range delivers the performance you need to tackle demanding jobs with ease. These units offer the ideal balance of power, efficiency, and durability for construction applications.	Built for the Toughest Jobs CP's CPS series of diesel compressors are built to power through the toughest conditions. Engineered for reliability in extreme temperatures, these units are easy to operate and service, with intuitive controls and rugged design.
---	--	---

Big Air - up to 1600 cfm	High Pressure Air - up to 14 bar	Utility Air - up to 250CFM
--------------------------	----------------------------------	----------------------------

Powering Big Projects with Big Air. With capacities up to 1600 cfm, these diesel compressors deliver the airflow and durability needed to power the biggest jobs on site.	High-Pressure Air, Built to Perform Delivering up to 14 bar, these compressors provide the extra power needed for demanding applications like drilling, blasting, and heavy construction.	Compact. Tough. Built to Integrate. Compact and skid-mounted, the CP Truck Air range is designed to fit seamlessly onto utility trucks and service vehicles. With single-side servicing, stackable units, and rugged reliability for tough Australian conditions, they deliver dependable airflow without taking up valuable space.
---	---	---

AIR POWERED, NATIONAL SUPPLIER OF CHICAGO PNEUMATIC DIESEL COMPRESSORS

Why We Choose Chicago Pneumatic? Built for Demanding Job Sites Chicago Pneumatic diesel compressors deliver powerful, dependable air for the toughest jobs. With rugged diesel engines and advanced screw technology, they maximise performance while minimising downtime. Built for today's demands and tomorrow's challenges, CP compressors combine durability, fuel efficiency, and easy maintenance - keeping your projects moving.	Standard Features Across the Range <ul style="list-style-type: none">• Red Rock Polyethylene Canopy• Spillage-Free Frames & Central Drain Points• Easy Service Layout with Single-Side Access• Heavy-Duty Filters & Ruggedised Control Panels• Extended Fuel Autonomy & Corrosion-Resistant Components• Integrated Lifting and Towing Points• plus more

CHICAGO PNEUMATIC EQUIPMENT RANGE

From compressed air to on-site power and lighting, the Chicago Pneumatic range delivers reliable performance across every job site. Featuring rotary screw compressors, diesel generators, and lighting towers, this equipment is built tough for demanding environments, combining durability, efficiency, and smart design in one proven package.

COMPRESSED AIR TREATMENT

Air Powered stocks a quality range of Parker and Pneumatech compressed air treatment solutions, including dryers, filters, and condensate management systems. Designed for clean, dry, and efficient air, our equipment supports both general and critical applications across all industries.

Rotary Screw Compressors

Diesel Powered Generators

Diesel Powered Light Towers

Parker Compressed Air Treatment

Pneumatech Compressed Air Treatment

The ultimate all-in-one compressor for workshops and small industry

From workshops and production floors to large-scale operations, CP compressors offer energy-efficient air power from 5.5 kW up to 37 kW – with fixed-speed, gear-driven, and variable speed options available to suit every application and budget.

Power for tough construction sites

Designed for tough construction environments, CPDG generators deliver reliable power with proven technology and rugged build quality. Easy to operate and move, they feature integrated forklift slots, a lifting beam, reinforced structure, and accessible service points, all housed in a durable galvanised canopy.

Light up your site

Built for tough conditions and tight budgets, our LED lighting towers offer a range of canopy and feature options. Designed for durability, ease of maintenance, and environmental protection, with long service life and strong resale value.

Parker Compressed Air Treatment

- Industrial Nitrogen Gas Generators
- Twin Tower Desiccant Air Dryers
- Modular Desiccant Air Dryers
- Portable Desiccant Air Dryers
- Rental Oil Vapor Removal System (ROVR)
- Refrigerated Air Dryers
- Compressed Air Filters
- PCO2 Series Carbon Dioxide Quality Incident Protection Systems
- Industrial Process Water Chillers
- plus more

Pneumatech Compressed air treatment

- Compressed Air Dryers
- Compressed Air Filters
- Breathing Air Purifiers
- Condensate Management
- Nitrogen Generators
- High-Pressure Nitrogen Skids
- Oxygen Generators
- Measurement Equipment
- V & V HP Compressed Air Vessels
- plus more

CONSTRUCTION TOOLS

From heavy-duty power tools to versatile hand tools, our collection combines durability, functionality, and ergonomic design to ensure optimal performance and reliability on the construction site.

CONSTRUCTION TOOLS

We offer a range of durable, high-performance tools designed for tough site conditions. From powerful equipment for trenching and concrete work to versatile air distribution systems and heavy-duty surface preparation tools, our selection helps keep your projects efficient and on schedule.

Atlas Copco Construction Tools

Atlas Copco Petrol Driven Breakers

Atlas Copco construction tools deliver the durability, performance, and reliability professionals trust. Whether you're breaking concrete, compacting ground, or drilling through rock, these tools are engineered to perform day in and day out.

Atlas Copco's Range Includes:

- Breakers
- Rock drills
- Breakers
- Rammers
- Plate Compactors

Chicago Pneumatic Construction Tools

Chicago Pneumatic Construction Tools

Chicago Pneumatic's range of construction tools are efficient, powerful & dependable.

Chicago Pneumatic's Range Includes:

- Breakers
- Rock drills
- Rotary & chipping hammers
- Clay diggers
- Pick busters
- Scabblers
- Sump & sludge pumps

PneuVibe Underground Borers

Features & Benefits

- Efficient and cost effective alternative to open cut excavation
- Two alternative head styles
- Long and short versions available
- Ideal for installation of sewage pipe, telephone, gas, and electricity line
- One year warranty

Sizes available from 45mm - 130mm

PneuVibe Vibrators

Features & Benefits

- Designed for use in concrete construction to provide improved concrete consolidation
- High performance vibration
- Built to withstand the harshest treatments
- Simple to use
- Easy to maintain

Sizes available from 25mm - 87mm

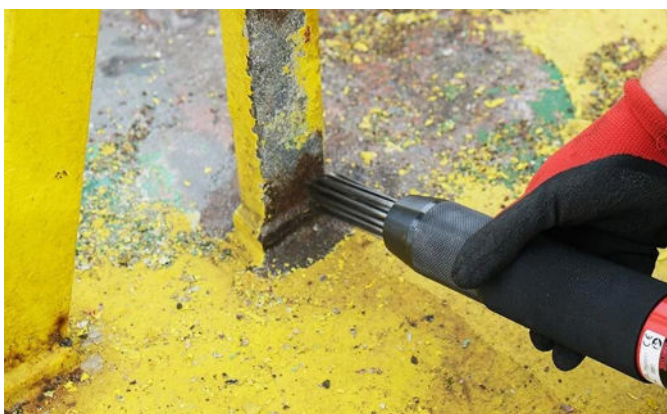

Christmas Tree Manifolds

Features & Benefits

- Custom built to suit clients requirements
- Perfect when multiple compressed air outputs are required

Trelawny Needle Guns

Features & Benefits

- Heavy duty pistol grip
- Unique Vibro-Lo vibration reduction system gives levels up to 8 times lower than standard
- Dust shroud attachment available
- Requires no additional tools for changing needles/chisels
- Quality engineering to exceed industry expectations

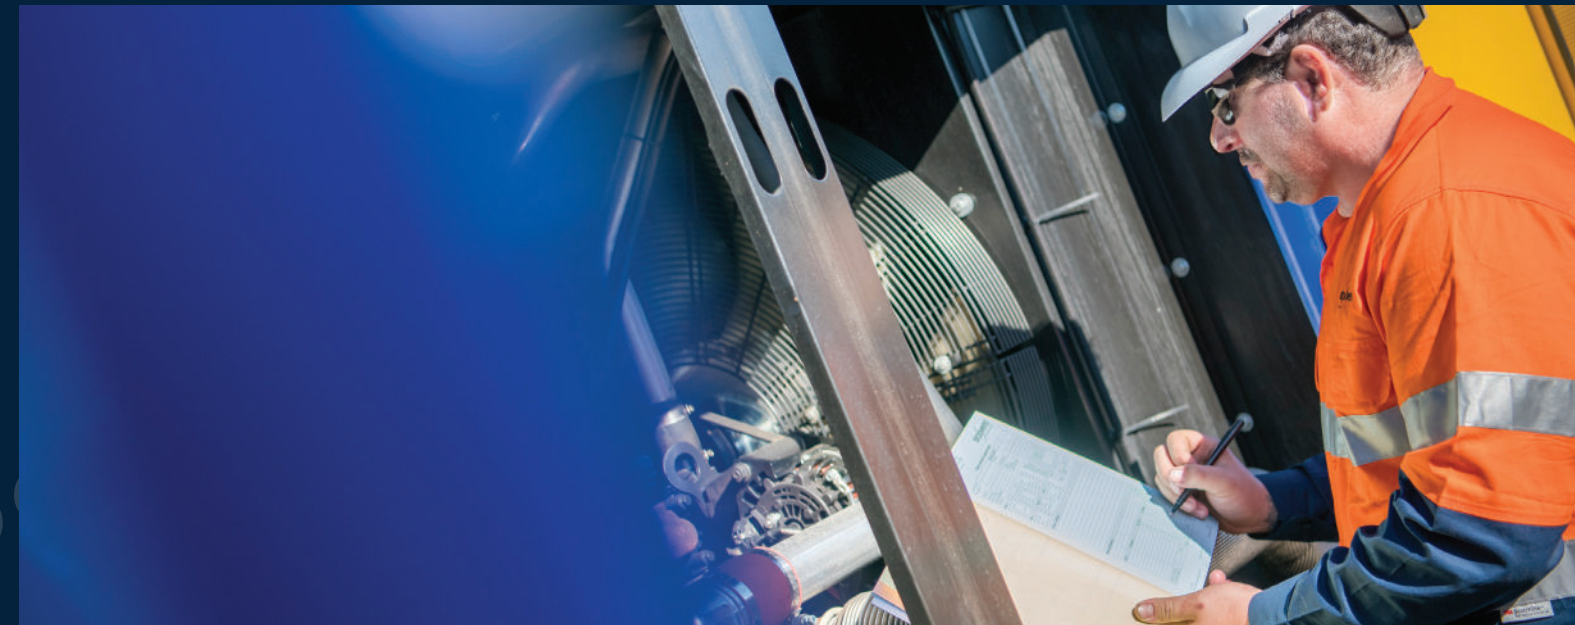

SERVICE

Whether it's your gear or ours, when it comes to downtime, the best defence is a good offence.

From routine maintenance and planned shutdowns to 24/7 emergency repair, our award-winning technicians will help you head off potential issues or quickly get you back up and running.

YOUR DEFENCE AGAINST DOWNTIME

If you're in construction or manufacturing, downtime is always going to be your biggest risk. Every hour your operators are left standing around while a recorded voice reassures you how "important" your call is to them, you're losing serious money.

All brands. All models. Anytime.

Tired of being stuffed around by other providers? Can't get a hold of your current service company when you need them most?

Call Air Powered.

Our team of compressed air specialists are available 24/7, ready to get you back up and running fast. We know downtime costs money - and we're here to keep your business running on air.

COMPRESSOR SERVICING

Air Powered provides a wide range of air compressor servicing options, including routine maintenance, repairs, and emergency support, ensuring optimal performance and minimal downtime for your compressed air equipment.

COMPRESSOR SERVICING

With our team of experience technicians and commitment to customer satisfaction, Air Powered delivers professional and efficient air compressor servicing that meets the unique needs of business across various industries.

Electric Compressor Service

Features & Benefits

- Servicing, repairs & maintenance from oil changes to full rebuilds & airends
- One-off or scheduled service plans tailored to your needs
- Back-up compressors available to reduce downtime
- 24/7 emergency breakdown support
- On-site servicing for minimal disruption
- Specialists in all brands: Atlas Copco, Kaeser, Compair, McMillan, Champion, Pilot & more
- Comprehensive coverage for all your compressed air needs.

Diesel Compressor Service

Features & Benefits

- Comprehensive condition and service reports carried out by qualified technicians using professional testing equipment.
- Reports cover every part of the compressor, including brakes and trailer condition.
- Servicing available for all makes, models, and brands.
- Full replacement of fuel, oil, and air filters, separators, jockey wheels, tow hitches, plus fabrication work tailored to your needs.
- On-site servicing available for maximum convenience.

Service Agreements

Features & Benefits

- Fixed price servicing - know what your costs are
- Reduced labour costs
- Zero downtime - free 'T'piece installed for each access to portable compressor during servicing
- Priority on Breakdown Callouts
- Regular scheduled servicing - helps to prevent breakdowns
- On-going compliance with all current safety standards
- Tailored service agreements to suit your needs
- 30% discount on compressor hire during breakdowns

24/7 Emergency Breakdown

Features & Benefits

- Available 24/7
- Qualified service technicians who come to you
- Fast response times
- Specialising in a huge range of compressors including; Atlas Copco, Champion, Kaeser, Pilot Air and more.

AIR AUDITS & LEAK DETECTION

Reduce waste. Improve efficiency. Protect your bottom line.
Air leakage and inefficient system performance are some of the biggest hidden costs in any compressed air network. Our Compressed Air Audits and Leak Detection services are designed to uncover those losses, optimise your system, and save you money.

COMPRESSOR INSTALLS & FACTORY PIPING FIT OUTS

End-to-end solutions for reliable, efficient compressed air systems.
Setting up a new compressor or upgrading your factory air network? Our installation and piping services ensure your system is designed, installed, and commissioned to deliver maximum performance, safety, and efficiency.

What We Do

Full Compressed Air System Audit

We perform a comprehensive assessment of your entire compressed-air network, from compressors and dryers through to pipework and end-use equipment. We identify inefficiencies, pressure losses and system weaknesses, providing a clear picture of where your energy, reliability and performance are being compromised.

Ultrasonic Leak Detection

Using advanced acoustic-imaging technology, our technicians locate leaks (air and gas pressure, also vacuum) rapidly and accurately — even in high-noise industrial environments. Each leak is photographed, documented, quantified and costed so you know the exact impact on your energy bill.

Detailed Reporting & Recommendations

Shortly after the audit you'll receive a full report outlining findings, estimated energy savings, and our recommended corrective actions. The report prioritises fixes that deliver the greatest return, helping you boost system performance and lower operational cost.

On-Site Repairs & System Optimisation

Our team can repair leaks, adjust controls and optimise compressor setup on-site to ensure long-term efficiency. We align your system's design, controls and maintenance regime so you benefit from reduced energy use, better uptime and extended equipment life.

Why It Matters

- Air leaks can account for 20–40% of total energy use in a compressed air system
- Audits help you reduce power costs, extend equipment life, and improve reliability
- Early detection prevents unnecessary wear, overheating, and unplanned downtime

Complete Installation Services

- Supply and install rotary screw compressors, dryers, filters, and air receivers
- Full system design to match your site, application, and air demand
- Electrical and mechanical integration for seamless start-up
- Commissioning and performance checks from qualified technicians

Factory Air Piping & Fit Outs

- Custom aluminium, stainless steel, HDPE, and modular piping systems
- Designed for optimal flow, low pressure drop, and energy efficiency
- Ring mains, drops, isolation valves, filtration points, and condensate management
- Clean, professional installations with minimal disruption to your operations

To the (air)power of one

At Air Powered, we're not a faceless corporation. We're a dedicated team of air specialists dedicated to handling all your hire, sales, and service needs. With us, you only need one name and number to keep your business running on air.

Big enough to power large-scale projects, but small enough you can always get a conversation with an expert who can quickly get things moving, we work harder to make sure our standard response is, "Consider it done."
